PROJECT1 CLASSIC HTML DOGUMENT

Like Lab 4 ...but different

New content - a person

PROJECT 1

Content drives structure

Do **not** just use...

<header></header>
<article></article>

<aside></aside>

<footer></footer>

...you can use those elements, but not in that exact way

PROJECT 1 STRUCTURE

Remember: can use elements multiple times! (except MAIN)

Typical:

HEADER

NAV (not yet)

MAIN

ARTICLE

SECTION

ARTICLE

ASIDE

FOOTER

...and others

Learn more about HTML structure (Google it!)

No content in-between the structural elements (think scaffolding)

OTHER NOTES

FIGURE and FIGCAPTION ...not required

Required: data table

- Know what is a "data table"
- No "inline styles"
- No old fashioned styling attributes: cellpadding or cellspacing
- Okay to use table-structure attributes: colspan or rowspan ...and other semantically appropriate things
- OKAY to use (actually, required for Project I): the old fashioned attribute "border"
